Stingray Spotlight

September Students of the Month!

5th Grade: **Caroline B, Eric T, & Ethan S.**
6th: **Dexter S**. 7th grade: **Anish R**. 8th grade: **James A.**

Great Job Stingrays! Keep it up!

Teacher Spotlight: Mr. Livingston

What do you think is most important in any classroom?

Relationships because you need to create a community where people support one another and become invested in class. You can't learn until you are comfortable with one another. People need to feel heard and seen. We didn't even turn on the computers for three weeks to create a strong community.

What do you love the most about being a teacher?

I love helping people, and I love learning. As a teacher, you also learn from your students. Patience, self-control, and brain rot. Lots and lots of brain rot. Quote-unquote from students: "siiiiiiiiiiiiiiixxxxxxx seeeeevvvvvveeeeennnnnnn."

Do you think playing Gimkit and Blooket with educational questions is beneficial in class or just a waste of time?

It is beneficial because kids are competitive, and it is a great way to get these questions in front of them, and when the teachers get the number of questions correct, they can identify what area the students need help with. It can also get them engaged.

Student Spotlight: Daniella C. in 8th Grade

When asked about her cultural background, Daneilla had lots to share about Venezula!

"My cultural background is filled with the sounds and the flavors of the streets of Caracas. The honking of the cars that fill the atmosphere whenever I go to my grandmother's house constantly remind me of my mother country, Venezuela.

Honestly, everything Venezuela has to offer is my favorite. The variety of accents that can be heard in one place is incredible to me. The fast-paced accent of Maracaibo and the slow and passionate accent of Caracas are just examples of some of my favorite things from my culture. The beautiful and deeply thoughtful lyrics of singers like Ricardo Montaner have brought tears to all generations, and the upbeat and Caribbean beats of Rawayana have revolutionized the music industry, showing Venezuela's versatility in music."

by Arya and Laura

Sports Highlights

The SSCS soccer team this year has had an incredible season! Let's introduce them!

The SSCS Stingrays are a middle school team for grades 7-8. All of the team worked very hard together to create an outstanding record. In total, they won 9 games and only lost 2 games. One was a loss on penalties, and one was a regular loss. In total, they had an amazing season!

We talked to Marcelino, the team captain of the Stingrays. He said that being captain is about giving confidence and being steady for the team. However, he also said that being captain of the team is a lot of pressure. He did an outstanding job with the team despite having so much pressure. He also shared some fun things about the team, such as the best part of being on the team, and he said that the best thing about being on the team is playing on the team and being there to support everyone.
A HUGE highlight of the season was the team beating St. Luke's soccer team, which is our biggest rival. This was our first win ever in a regular season game against them. We won 4-3. This was a huge accomplishment for our soccer team. Congratulations!

Overall, we had an amazing season and can't wait to see what they can do next year!

by Kaiya

Hispanic Heritage Month

What is Hispanic Heritage Month?

Hispanic Heritage Month is a month when we celebrate achievements, traditional foods, traditional music and dances, and honor people. Each day, people celebrate a different country. On September 15th, we celebrate countries such as Costa Rica, El Salvador, Guatemala, Honduras, and Nicaragua. Other countries to celebrate include Mexico, Chile, and Belize. Hispanic Heritage Month is September 15th through October 15th. This allows not just Hispanic people to learn about and celebrate their heritage; it also allows people all around the world to learn about the culture and contributions of Hispanic cultures. Did you know the population of the Hispanic community in the U.S. is about 60 million? This enriches our nation with entrepreneurs, athletes, artists, entertainers, scientists, and more!

Why is Hispanic Heritage Month Important?

Hispanic Heritage Month is important because it represents the heritage, culture, and accomplishments of many people. It shines a spotlight on the Hispanic community and lets new voices and experiences be shared, such as people's achievements, history, and journeys. This can also help and inspire future generations.

Think about the many contributions Hispanic people have made throughout history. An example is Roberto Clemente. Roberto Clemente earned 12 Gold Gloves and won an award for the best fielding player. Even though he was a great baseball player, he was still discriminated against throughout his journey, but he still powered through. He stated, "My greatest satisfaction comes from helping to erase the old opinion about Latin American and Black baseball players." This shows how many Hispanic figures like Roberto Clemente made a difference for their people and our world.

How can people celebrate Hispanic Heritage Month?

There are many ways you can celebrate Hispanic Heritage Month! Some ways you can celebrate are by cooking food from different cultures. Some things you can make are chimichurri sauce, which originated from Argentina and is great with vegetables or proteins. Another food you can make is migas, which originated from Spain, Portugal, Mexico, and Texas. It's made out of scrambled eggs and tortilla chips with some nice melty cheese and pico de gallo.

You can also celebrate it by taking in real-life tours in museums. You can learn about Hispanic music, art, and history! And if you can't do that, you can take a virtual tour online and see famous places like Plaza de Armas and see its architecture!

Another way you can celebrate Hispanic Heritage Month is by learning about traditions. An example of this is a quinceañera, which is a celebration of a young woman turning 15. If you want to just lie down and relax but still celebrate Hispanic Heritage Month, you can by watching movies that feature Hispanic culture. Some classics you can watch to immerse yourself that are also fun at the same time are Coco and Encanto!

by Logan M.

Highlighting Hispanic Heritage

Mrs. Rodriquez - Colombia

Mrs. Rodriquez was born in Pereira, Colombia and raised in New York. She loves the food because Colombian food transports her to her childhood. Every time Mrs. Rodriquez hears a Colombian song, she gets excited. It makes her happy, and it makes her feet automatically move. When asked about the importance of Hispanic Heritage Month, Mrs. Rodriquez said, "I feel a sense of pride every time I hear or see anything that reminds me of my motherland, Colombia. Being Hispanic is amazing because I see how rich our culture is and how many things all Hispanics share in common. I also see the many accomplishments Hispanics have achieved. Sharing a heritage with others and celebrating it also gives me a sense of belonging and reminds me that I have strong roots that will follow me no matter where I go. I also love that we celebrate Hispanic Heritage Month because now I can teach my son my sense of belonging and I can help him grow his roots."

Ms. Malca - Peru

Ms. Malca's father was born and raised in Trujillo, Peru. She was lucky enough to visit her family there several times while she was growing up. Sadly, she has not been back since 2012. Her favorite part of her culture is the ancient history attached to it. Did you know Ms. Malca is a descendant of the Inca Empire? How cool! Her favorite food from Peru is a sauteed beef dish called lomo saltado. You eat it with rice and french fries! Potatoes are a huge part of Peruvian culture. Ms. Malca thinks Hispanic Heritage Month is important because it helps the many Hispanic cultures feel connected while letting others learn about what makes our cultures different and special.

Mrs. Arnay - Chile

Mrs. Arnay's cultural background is Chilean. Her favorite parts of her culture are Chilean food, spending time with family who lives in Chile, visiting the Andes Mountains because they is snowy. She enjoys empandadas filled with meat and olives, Mexican boleros, and mariachi music. Mrs. Arnay says Hispanic Heritage Month is important because it helps to recognize the different diversities people come from.

Hispanic Heritage Night

by Hanika

On October 15, Seminole Science Charter School celebrated Hispanic Heritage Night. Families and staff enjoyed food, music, and performances from many Hispanic cultures. Performances included percussion performance, a poetry reading, a play, a ukulele performance, and dancing.

The Play

7th-grade student, Kamila, wrote a play inspired by Pixar's *Coco*. The play followed Elayna and her family as they decorated their ofrenda for Día de los Muertos. Elayna didn't understand why they had to celebrate, but when she found her grandfather's journal, everything changed... The play included live music featuring English and Spanish.

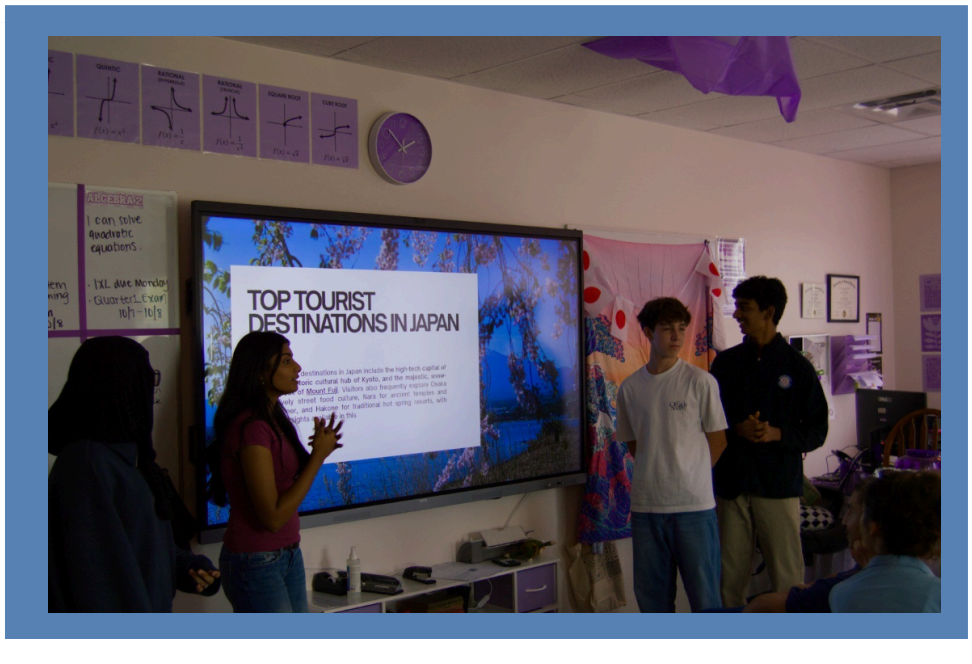
The students who acted in the play were Kamila, the writer and lead actor as "Elayna"; Claire, acting as "Mom"; Gianlugi, acting as Diego, Elayna's brother; Ancestors 1, 2, and 3 played by Taim, Danvin, and Hemapriya; Arina as Grandma; Suhuas as Dad; and Aryan as the narrator. Hemapriya, Claire, Taylor, Shrivitha, Sarina, Mila, and Smithika were all the set designers. Ms. Santiago hosted the play and the event.

Thank you to every volunteer, parent, and staff member who helped to make this event possible. A special thanks to everyone who brought Hispanic food!

Asian Student Association

ASA, which stands for Asian Student Association, mainly focuses on learning about different cultures found throughout Asia. It was founded by Burak to encourage Seminole Science Charter School students to learn about different countries. The club also has a vice president, secretary, treasurer, and someone in charge of social media. ASA focuses on learning about one another's cultures and discovering interesting facts about Asian communities. The goal of the club is to have a ton of fun together, regardless of members' cultural backgrounds, as well as to learn about different cultures and how they interact with one another.

On September 30, the club held its first event to celebrate Japanese culture. Ninth-grade students created and delivered presentations about Japan. All of the students enjoyed Japanese foods and drinks, such as sushi, rice snacks, and ginger soda. If any of this sounds interesting, Asian Student Association events are open to students who aren't club members for just $5.



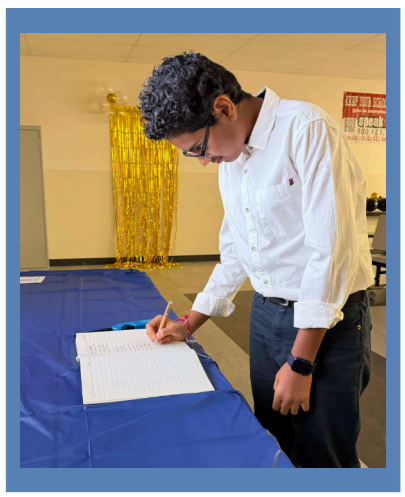
by Penelope and Amelia

NJHS Induction Ceremony

On September 23, NJHS hosted its annual induction ceremony to welcome its newest members. Led entirely by students, the ceremony was a wonderful success.

NJHS alumni spoke to the new inductees about the five pillars of the National Junior Honor Society: leadership, citizenship, service, scholarship, and character.

The NJHS President, Isabella M., led the new inductees in the NJHS pledge, officially welcoming them into the organization and reminding them of the high expectations and responsibilities that come with being an NJHS member. SSCS is incredibly proud of the newest members, and we all look forward to seeing how they demonstrate leadership,



Congratulations to...

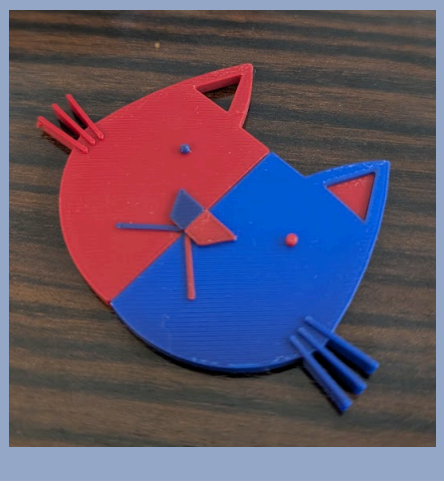
3D Printing with Ms. Dawes

CAD, short for Computer-Aided Design Club, features designing anything your mind can create—under guidelines, of course. Run by Ms. Dawes, the club is for kids who are interested in making this type of art.

What is CAD? Ms. Dawes says, "CAD stands for Computer-Aided Design, so students make and design models online in CAD software. Some examples of CAD software are Tinkercad, Autodesk Fusion, and OnShape, which is the program I teach my students in our Engineering class. When students get to high school, they choose 1 out of 3 pathways to follow, and their choices are Biomedical Sciences, Computer Science, or Engineering. Once students design something in CAD, it can be 3D printed in a variety of colors of filament. The filament, or plastic material, gets heated up and melts into a liquid in the shape of the model the students make. I assign my students certain things to make, and then we print them. Some of the pictures you see are from the keychains my students designed for each other."

You might be asking, "Where do I even start in the art of CAD?" Well, the club thinks that sites and hands-on experiences are the best ways to learn. You can use sites like Tinkercad and Onshape for free designing and easy usage. Some people may think it's difficult to design something to print, but if you put your mind to work and get help, CAD becomes exciting to do!

If you are interested in creating things from brain to product, join CAD today!



by Asher

CNN

On September 30th, journalist Sarthak sent out a poll to asking about the cafeteria meals. Around 16 people anonymously replied to the questions. The responses varied wildly between individuals.

When asked about the rating of the cafeteria food that day, people replied with ratings between 1 and 9, Although on average the rating was 5. However, most reviews gave the meals an 8. They were then asked what the best food from the cafeteria was this month. The favorite food was the Mac & Cheese, but many other foods were mentioned as well. Some of these included chicken, grilled cheese, nachos, yogurt, and pizza. Confusingly, when asked about what the worst food was, the same people selected pizza.

Next, students were asked what food should be added to the school cafeteria. The answers to this question were so varied that there was no general response. Some standouts included the following: "HALAL CHICKEN TIKKA BIRYANI," spaghetti sushi, chow mein, dumplings, and other kinds of noodles.

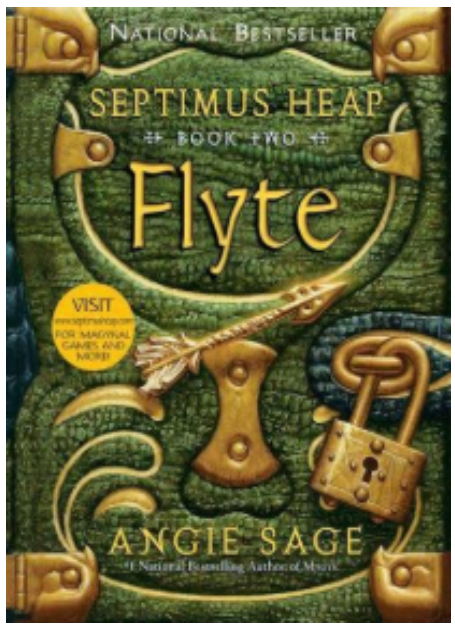
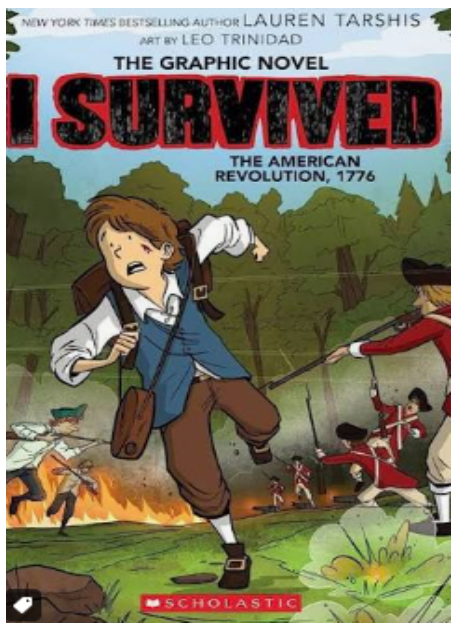
Book Recommendations



As Septimus learns the fine arts of Magyk under ExtraOrdinary Wizard Marcia Overstrand and Princess Jenna enjoys the freedom of the Castle, a sinister and mysterious threat emerges. Marcia is constantly trailed by a menacing Darke Shadow, and Septimus's own brother, Simon, is bent on a strange and bitter revenge. The synopsis asks the ultimate suspenseful question: Why is the Darke Magyk still lingering, and what happens when the greatest threat comes not from an old enemy but from your own family? Still great for: Harry Potter fans, fantasy enthusiasts, and anyone who likes magic.

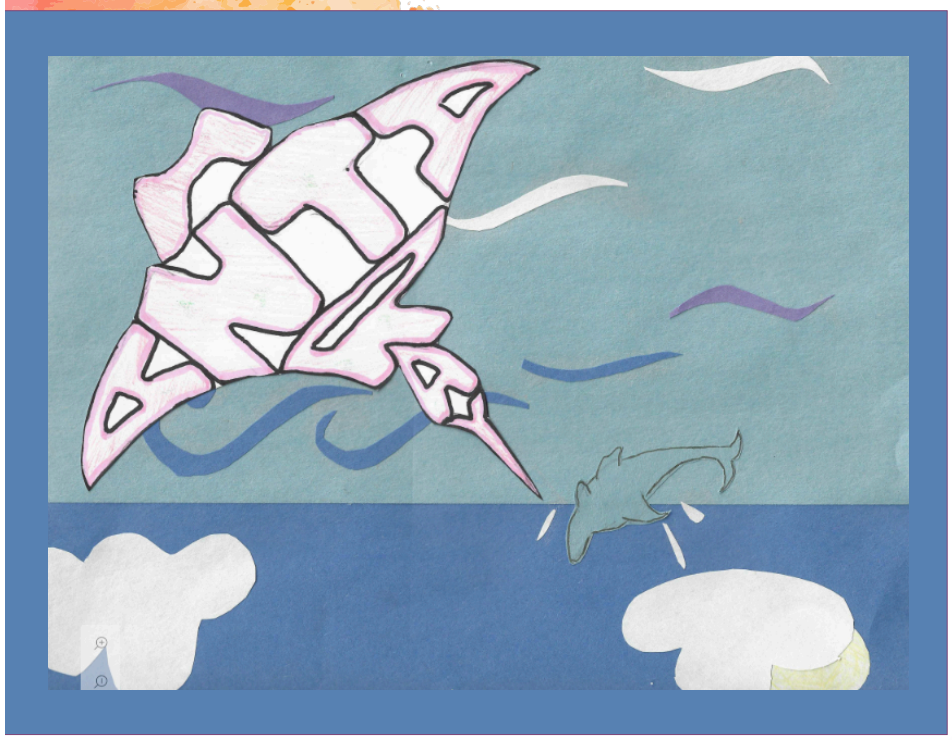
The InvestiGators graphic novel series follows two alligator secret agents, Mango and Brash, as they solve crimes using toilet-based travel and high-tech gear. Meet Mango and Brash, sewer-loving secret agents of S.U.I.T. (Special Undercover Investigation Teams). They are equipped with V.E.S.T. (Very Exciting Spy Technology) and unique toilet-based travel methods through the city sewers. On their very first joint assignment, they must go undercover at a local bakery to find missing celebrity chef Gustavo Mustachio and protect his secret recipes while simultaneously tracking down a bizarre robbery at a nearby high-tech science factory.



Nathaniel Fox never imagined he'd find himself in the middle of a blood-soaked battlefield, fighting for his life. He's only eleven years old! He's barely paid attention to the troubles between America and England. Instead, he's been worked to the bone by his cruel uncle. But when his uncle's rage forces him to suddenly flee home, Nate finds himself in New York City, in the middle of the American Revolution. He encounters an old friend and joins his army regiment as a camp helper. Soon the British invade, and nothing goes as planned. Can Nate survive the war's biggest battle yet?

by Adarsh

Art of the Month



Dhanvin P. has been showing incredible growth in art class. His turning point was a typography assignment that depicted a manta ray. Dhanvin took this normal idea and turned it into something extraordinary. He drew an entire ocean environment around it. The final piece was a true masterpiece. This reveals Dhanvin's remarkable potential as a rising artist and has earned him a spot on Art of the Month due to his incredible skills in Visual Art.

Pranathi R. is an artist who made a beautiful piece of art for the Frida Kahlo Project. It has a stunning background, showing where she's from, her favorite animals, and plants that she likes. She shows great detail throughout her painting. The color scheme works naturally, and the sketching is spot-on. Pranathi's awesome painting earned her a place on Art of the Month!

by Asher

Bubbles' Tales

October Character Trait: Responsibility

The bright lights of the quiet classroom reflected off of Mr. Bubble's pen. An AC hummed beside him as he fidgeted with his cracked glasses. It was a bit too silent. It made him grumble and become restless. He wanted to do something—anything, and now. He abruptly stood up from his rolling chair and brushed off a speck of dust on his suit. His friend's birthday was coming up, and he was recently appointed as the mastermind to plan the party, especially since it was also the anniversary they moved to Seminole. The day was an urgent matter.

"Birth-iversary," Bubble gasped. "It'll have to be huge. Double important things on the same day...maybe I'll use a ton of balloons, confetti poppers..."

Bubble had decided to bear the weight of everything himself, stubbornly protesting when a few others offered some help, waving his hand dismissively."I got this. Don't worry."

Bubble yanked out the drawer on his desk, grabbing a few markers and colored pencils, shoving two in his mouth as he waddled over to grab some blank sheets of paper. He was coughing on some pencil dust as he threw the materials onto a nearby table, uncapping a marker roughly before stopping short.

He thought for a moment, the reality of just what he was carrying on his shoulders hitting him in a pang. "I got this. Don't need help. I'll get it done by me, myself, and I..."

He worked frantically, squiggling the markers in random fretful lines, mapping out the "blueprint" of the party. The red marker bled heavily through the first page, soaking onto the table and staining it. Mr. Bubble didn't care, drawing a massive red circle he called "La Grande Fiesta." (Though he had no experience in the Spanish language.) By the time the sun rose, Bubbles was snoring in his chair, the blueprint half finished.

He woke with a jolt, gasping, swiveling his head to the calendar. He squinted, grabbing his glasses, and scanned the calendar closely. He leaned in and huffed, seeing where the last "X" was. Suddenly, a wave of dread came over him, making him pale and burst into a cold sweat.

He had misread the date. It wasn't coming next week.

Today was his friend's birthday.

"How did I mess up? I thought it was next week...I haven't planned yet... oh God, oh goooossshhh...." Bubbles groaned, rubbing his face, plopping back down in his chair and spinning around. He processed the fact that he needed to do everything within the span of an hour, since the party started at 2 P.M. It was already 1 P.M.
He grabbed his blueprint, rushing out the door and hopping on his bike. He waited anxiously at stop signs and traffic lights, counting down in his mind. Every second wasted was a grievance for his friend. Time was of the essence here.

He attempted to reassure himself as he skittered into the party site—a large yard they had rented, close to his friend's house, a few blocks down the way, tucked into a green corner that nobody really visits anymore other than the occasional few bunch of children who would play around with jumpropes. It was guarded with a nice white fence and a little gate. It was big enough for a huge party, albeit, for Bubbles, maybe a bit too big for the time he had.
"Should've asked for help," He mumbled, throwing all the materials he had—party favors, banners, confetti...
He set a timer. 30 minutes. And he set to work.

At around 20 minutes left, in his hurry to get it done, he toppled over the black table he had set—it had everything ready, including the beautiful pink cake Mrs. Mable worked so hard on, the party favors, and a banner that read Surprise!

by Laura

Bubbles' Tales

The cake was ruined, turned to mush into the grass. The banner seemed to “deflate”, sagging low onto the grass as well. Bubbles gathered the scattered pieces of cake in his hands. He promised he would make an amazing party for his friend, create awesome memories and fun times with his fellow peers, but he wasn’t so sure he could keep it now, sitting in the leftovers of buttercream cake.

He let out a shaky breath and stood up, trying to put together what he could. There was only a few minutes left before everyone would arrive, expecting a huge celebration. Bubble bent down and grabbed his broken glasses, and made a final hesitant decision.

He nodded, and turned to the ruined decorations.

“Buuuubbblleess!” A cheerful voice called. It was his friend, the birthday girl—Swimmers. She was here with a few other guests. They paused in shock when they saw the yard.

Bubbles had the black table up, a new, much smaller cake, a few plates and utensils on there, too. He had a few dozen batches of cupcakes and a small amount of decorations—a pink backdrop of the birthday’s theme, which was flowers, a large banner he fixed that said Happy Birthday! And a few white seats around little tables covered in rose confetti.

“Hey, Swimmers.” Bubble smiled a quiet smile that didn’t fully reach his eyes as he flushed at their stares. “I know, I know...it isn’t what you expected, but...I made a ton of mistakes. I told everyone I would take full responsibility for the super important party, that I could do everything myself. I would be the best party maker ever. But I didn’t know I had to do so much in so little time. I lost track of the date, messed up the original decorations, arrived late...I know this probably sucks, but—I’m sorry

Swimmers quietly stared at him for a moment, a heavy silence settling between them. The only sound was the rustle of grass.--

Then, her face broke into a soft smile.

“Thanks for admitting it,” Swimmers said, playing with her dress before walking toward the table. “I’m not mad. This?” She vaguely gestured at the decorations, “Is amazing. I like it. I really, really like it. And what do I like best?”

Bubbles looked up hesitantly. “What do you like best?”

“The fact you owned up to it and are willing to take more responsibility. Frankly, that's the best birthday gift I could have.”

She wrapped her arms around him and squeezed, hugging him tight. Bubbles chuckled.

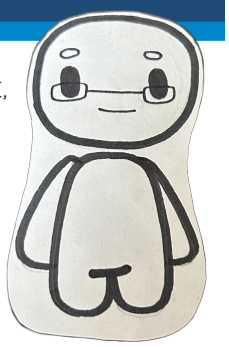
“Thanks. But we should party!”

“Yeah!” Swimmers squealed.

Check out the Ray Report next month to read more about Bubbles' adventures.

Ask Bubbles

Ask Bubbles is an article where you can find advice, comfort, and answers to everyday questions. Each month, you can submit questions to the Journalism Club, and we will randomly pick 3 questions to answer in the article. These questions will be addressed and answered anonymously by Bubbles, a nice little bubble that can help you out with everyday problems.



October's Theme: School Advice

How can I motivate myself to study?

Studying is something that takes a lot of focus and is often something that you want to avoid. I can't promise that these tips will make studying as interesting as the things you do in your free time, but they will make it feel a bit less like a chore. A good way is to make studying a habit, just like eating, taking a bath, brushing your teeth, etc. Pick a place and time that you will devote to homework and studying for tests. It does not have to be long, and you can have some 5- to 10-minute breaks in between. I like to take out 2 hours of my day for studying, and I can spend the rest of my time doing whatever I want. If you need a space that isn't completely silent, you may want to sit in a living or dining room. If you need your peace and quiet, you may want to sit in a bedroom or a quiet place in your home. You can also set a reward for studying for your planned amount of time, like a treat, a nap, or doing something you like. At the start of every major study session, write down your goals for the session and how what you are doing will affect you both in the short term and in the long term. For example, if you are studying for a science test, the short-term impact is passing the test, and that is what you should be working towards. The long-term effect is that it will prepare you for future science classes and help you get the job you want later in life. A good academic foundation can boost your grades in high school and beyond. All things considered, to motivate yourself to study, you should set goals, add it into your daily routine, and acknowledge why you're studying and what results you hope to achieve. This is Bubbles signing out!

How can I bring my grades up?

Grades are numbers that depend on a lot of different factors, including effort, accuracy, and aptitude. Some of these things are under your control, and some of them are not. To keep your grades up, you need to maximize the parts you can control. For example, you cannot control how quickly you absorb information in a certain topic. Still, you can work hard and push yourself to explore the topic further. One way to bring your grades up in a subject you're not very good at is asking for help. Teachers or a friend who is good at it will probably be more than willing to help you out. If you want to improve by yourself, you might want to spend some more time studying it and trying to understand it in different ways. Practice is also key in order to memorize facts, learn new methods to do things, and process information. Everyone struggles with something, but working a little harder on one thing can significantly impact your grade, believe it or not. Another way to bring up your grades is by seizing any opportunity for extra credit, so that if you mess up something that impacts your grade a lot, like a test or project, you can still improve your overall grade in the class. When it comes to projects, you might want to tackle a bit every day and split the work evenly over the time you're given. Always try your best, because even if you're not a pro at something, your teacher will do their best to help you if they see you're trying your best. It's also helpful to remember that most of the time, you don't get a better grade for finishing first; it matters more to take longer to get it right. In the worst-case scenario, where you still have a bad grade after trying these things, remember that grades are just numbers, and they do not define your value as a person in any way. This is Bubbles signing out!

How can I make sure I don't freak out before tests?

Tests are often stressful, especially because they have a big impact on your grade. The best three things you can do before a test include preparing your mind with focused study sessions, getting a good night's sleep, and eating a good breakfast. Cramming multiple days of studying into one night is not going to make you feel any more confident, so make sure you split it up into multiple days. This will help you feel more prepared, and you won't need to think as much to recall the information. Having a good night's sleep is also essential because it helps your brain feel sharp and refreshed instead of worn out and stressed. A good breakfast gives you the energy and brain power you need and helps you feel energized and confident. One other way to make sure you stay calm is to understand that the test does not define you and that getting a bad grade on a test does NOT mean you are a failure and does NOT mean you can't improve and do better next time. Even the most famous and important people in the world have failed, but have gotten back up on their feet, learned from it, and tried harder next time! Try to make sure you are seated comfortably and distract yourself a bit if you need to. Go through some test-taking strategies you'll use, like the process of elimination, highlighting, etc. If you studied and prepared yourself, you're probably going to do great, and keep in mind that you are taking that test because you have shown that you're capable of passing it. Just remember that tests are just sets of questions that see how much you know, so show them what you've got! This is Bubbles signing out!

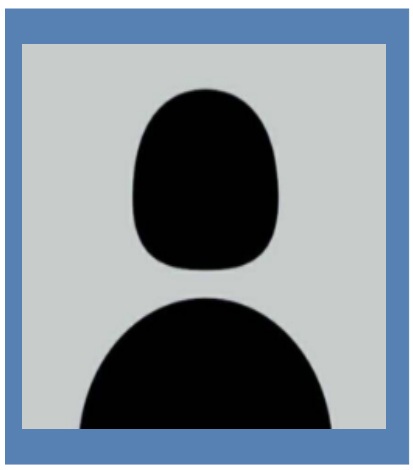
Meet the Team!

ARYA IS THE EDITOR OF THE RAY REPORT. SHE LEADS MEETINGS, OVERSEES DECISIONS, AND APPROVES THE FINAL NEWSPAPER FOR PUBLICATION.

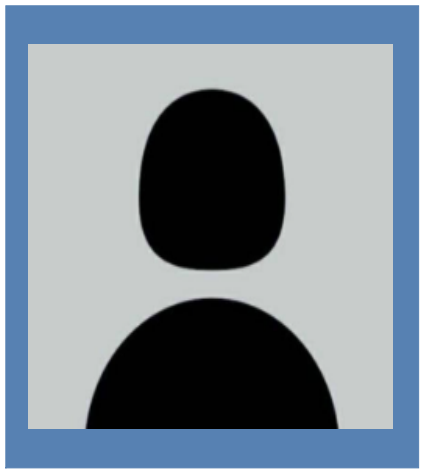
YEVA IS THE ASSISTANT EDITOR OF THE RAY REPORT. YEVA ASSISTS THE EDITOR IN HER DUTIES, PROOFREADS WRITING, AND CONTRIBUTES TO EVERY SECTION.

VICTOR IS THE DESIGN LEADER OF THE RAY REPORT. HE WORKS TO CREATE GRAPHICS AND ORGANIZE THE NEWSPAPER LAYOUT.

Adara is the Photographer for the Ray Report. She captures the best pictures and helps out with writing articles.

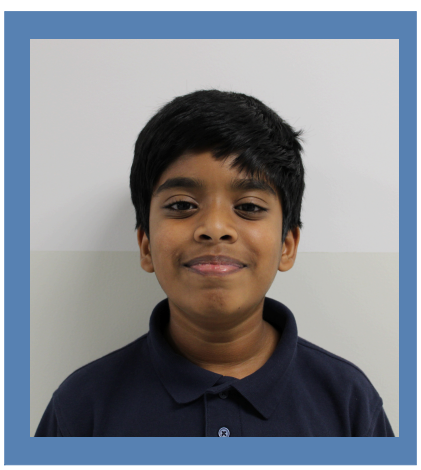


Laura is a Writer for the Ray Report. She leads the Bubbles' Tales creative writing section. She enjoys writing stories and poems.



Sarthak is a Writer for the Ray Report. He leads CNN: Cheese and Nacho News. He works hard to provide you with quality food reviews.

Asher is a Writer for the Ray Report. He leads Meme of the Month. Asher also writes for Art of the Month and other articles.

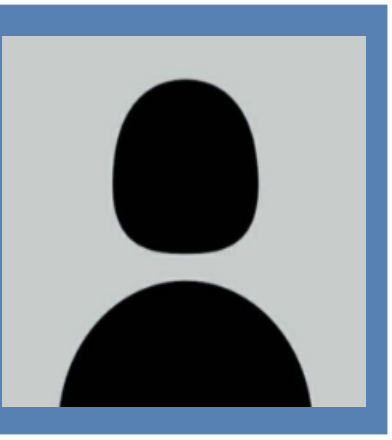


Adarsh is a Writer for the Ray Report. He leads Book Recommendations. He also helps meme of the month, and more.

Meet the Team

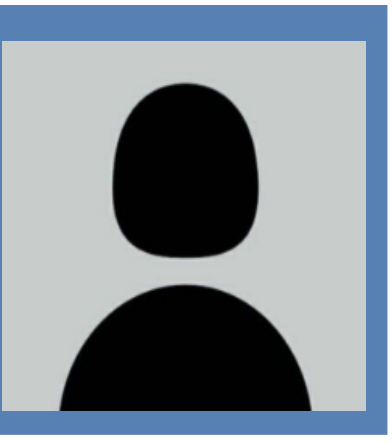
Hasini is a Writer and Interviewer for the Ray Report. She writes questions, interviews the guests, and creates on articles.

Penelope is a Writer and Interviewer for the Ray Report. is on the interview team. She writes the questions, interviews the guests, and creates on articles.



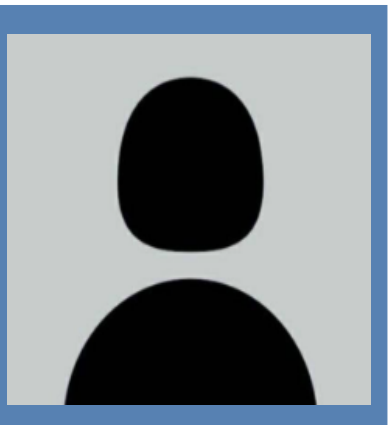
Aaruhi is a Writer for the Ray Report. She leads the Ask Bubbles Advice Column. She also writes articles and helps the interview team.

Amelia is a Writer for the Ray Report. She works with the interview and helps with articles.



Logan M. is a Writer for the Ray Report. He writes articles and researches topics. He is one of our newest members!

Hanika is a Writer for the Ray Report. She writes articles, researches topics, and helps with many newspaper sections.



Kaiya is a Writer for the Ray Report. They lead the Sports Highlights section. They are one of our newest members!

Mrs. Soper is the teacher in charge of Journalism Club. She helps organizing and giving ideas for the team. She has done a lot for the team, and we are so grateful with her. She is in room 138.

Red Ribbon Dress Down

Red Ribbon Week is had lot of kids dressing up for the different dress-down days! That's why we want to hear what you wore! Just turn in your pictures or descriptions to the suggestion box found in the cafeteria. Can't wait to see your Red Ribbon Week outfits, Stingrays!

SUGGESTION BOX

If you have any suggestions, let us know in the Suggestion Box in the cafeteria at the hallway entrance. We will be reading each and every one of them, so remember to turn some in. Bubbles is eager to hear your ideas!

Journalism Club's second newspaper just came out this October, and with it came a new Halloween-themed logo! Each month, we are planning to have the logo change based on the holiday. We are pretty proud of this edition, and we hope everyone will enjoy it too. Happy Halloween, everyone! We hope you get a lot of candy!
