

LEAK DETECTION AND REPAIR

WHY APTIM

For 30+ years, APTIM has provided high-quality, comprehensive, innovative, and personalized services to the petrochemical, oil and gas, pharmaceutical, and chemical industries. Our professional team of technical staff and project managers are highly-trained experts in Leak Detection and Repair (LDAR). We customize programs to fit individual client needs and budgets, and offer a wide variety of environmental services.

EXPERIENCE

Our experience goes far beyond routine monitoring. We have built LDAR programs from the ground up, which have been ongoing for years. We provide support services such as tagging, field verifications, compliance and efficiency evaluations, emissions calculation, and reporting. We also provide broad scopes of service such as consulting, permitting, and applicability reviews.

TRAINING

Our training programs are suited for every phase of LDAR program involvement and provide consistent, high-quality services. We offer certification training designed for those who are responsible for monitoring volatile organic compound (VOC) emissions from process equipment which includes:

- ▶ Customized LDAR training
- ▶ Regulated equipment and potential leak sources
- ▶ Method 21 testing procedures
- ▶ Portable VOC measuring devices
- ▶ Regulatory training
- ▶ Facility compliance audits

QUALITY ASSURANCE/QUALITY CONTROL

Our Quality Assurance/Quality Control (QA/QC) programs range from daily field activities to data management. Our practices include weekly time/date stamp evaluations and calibration record checks, quarterly record reviews, and semi-annual comprehensive audits that consist of creative, non-standard systems providing data integrity, a crucial component of a successful LDAR program.

LEAK DETECTION AND REPAIR

- ▶ LDAR programs management and reporting
- ▶ P&ID reviews and inventory projects
- ▶ Customized training
- ▶ El Paso sampling
- ▶ Third party and consent decree audits
- ▶ Optical Gas Imaging (OGI)
- ▶ Greenhouse gas testing and reporting

In addition to setting up and managing decades of quality LDAR programs, we provide:

- ▶ Environmental consulting
- ▶ Steam trap surveys
- ▶ Ultrasonic testing
- ▶ Industrial maintenance
- ▶ Reliability consulting services

CONSENT DECREE EXPERIENCE

Our consent decree knowledge includes extensive experience managing large facilities for 25+ years. We currently service 10+ facilities operating under consent decrees and provide them with the support, training, and documentation required.

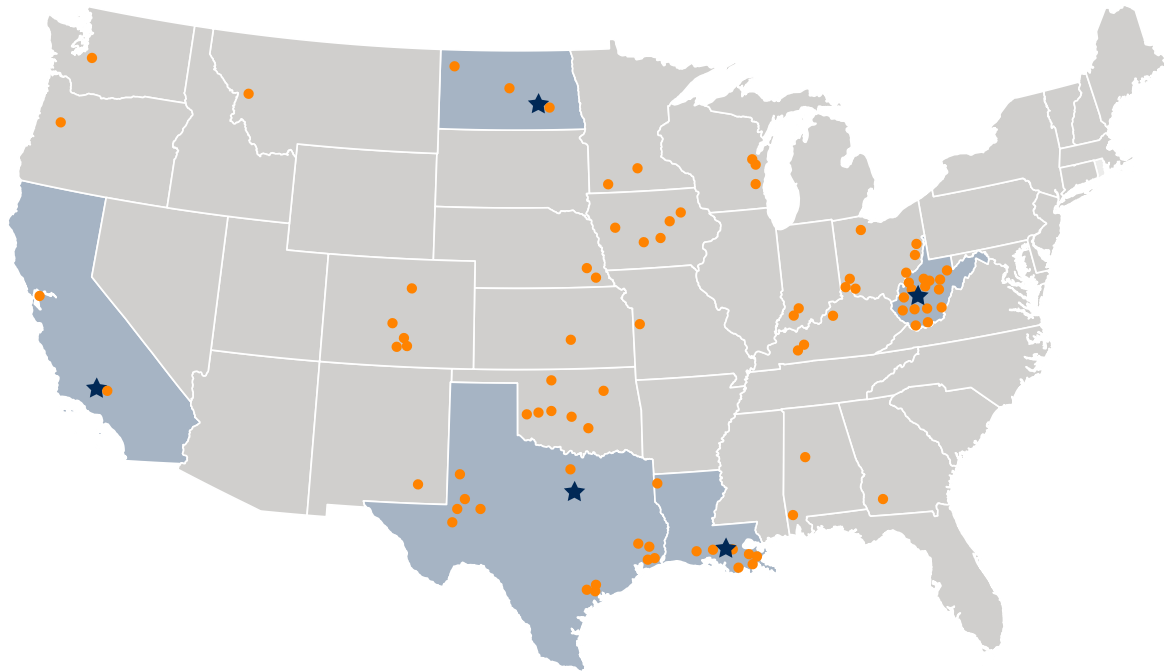

DETAILED OPERATING PROCEDURES

Our detailed operating procedures, compliance, and training manuals are integral to a successful and efficient program. We have developed numerous guidelines defining the roles, responsibilities, and expectations for personnel in programs, which are designed to be adaptable to the processes and procedures of each client. This provides accuracy, consistency, and compliance throughout the program.

LOCATION IS KEY

Key factors of a successful LDAR program are the location and availability of staff and resources. Our main offices are based in Texas, Louisiana, and West Virginia, and have technical staff and program specialist located strategically throughout the country.

Experience the Best

As LDAR programs have evolved over the past 30 years, so has APTIM. We are constantly seeking out ways to lead the industry while maintaining the fundamentals that set the foundation for our success. We are a client-oriented, solution-based company who understands there is more than one right way. Whether you are looking for a full service LDAR consultant, completing a tagging or P&ID project, or needing certified OGI professionals, we have the solution for you. Call us today to find out how we can assist you with all your air compliance needs.
