

ENVIRONMENTAL SOLUTIONS

APTIM provides government and commercial clients with comprehensive environmental and infrastructure related services including program management; engineering, procurement, and construction; emergency response and disaster recovery; environmental remediation and restoration; and environmental engineering and consulting. We incorporate safe, proven systems and procedures to effectively and efficiently deliver complex projects around the world.

CORE COMPETENCIES AND CAPABILITIES

- ▶ Environmental investigation, design, remediation, and restoration
- ▶ Emergency response and recovery
- ▶ Hazardous waste
- ▶ Solid waste
- ▶ Auditing and compliance
- ▶ Environmental management
- ▶ Air quality control
- ▶ Environmental liability
- ▶ Due diligence
- ▶ Science and technology
- ▶ Coastal restoration and protection
- ▶ Program/project management
- ▶ Design-build
- ▶ Water/wastewater
- ▶ Bridges, roads, and highways
- ▶ Transportation facilities
- ▶ Ports and harbors
- ▶ Base operations and maintenance
- ▶ Sustainability

ENVIRONMENTAL SERVICES FACTS

- ▶ Leading U.S. Department of Defense, Environmental Protection Agency, and Federal Emergency Management Agency contractor
- ▶ Managed design and construction of the Inner Harbor Navigation Canal Surge Barrier Project, the largest-ever design-build civil works project for U.S. Army Corps of Engineers
- ▶ First responder to national and global disasters e.g. 9/11 terrorist attacks, 2001 anthrax attacks, Hurricanes Katrina and Sandy, and the Fukushima crisis
- ▶ Designed state of Louisiana's Master Plan for a sustainable coast
- ▶ Managed construction of barrier berms in response to the Deepwater Horizon oil spill
- ▶ One of the largest integrated solid waste service providers in the U.S.
- ▶ National leader in restoration and redevelopment of environmentally impaired properties
- ▶ Holder of nearly 50 patents for environmental technologies including emerging contaminant treatment
- ▶ Leader of cost-effective sustainability solutions
- ▶ Leading provider of coastal protection and restoration services
- ▶ 50+ years of port and terminal-related engineering services

ENVIRONMENTAL INVESTIGATION, REMEDIATION, AND RESTORATION

APTIM is a leading environmental remediation contractor for government agencies and private-sector clients worldwide. We execute complex restoration projects at Department of Defense installations, as well as Environmental Protection Agency (EPA) and other government and commercial properties, laboratories, and nuclear facilities. From excavation and off-site disposal to the application of our patented technologies, we provide effective, low-cost solutions to your remediation projects in full compliance with regulatory requirements.

PROGRAM AND PROJECT MANAGEMENT

Our resources and proven systems efficiently manage the budgets, schedules, and quality of complex projects. Our capabilities have contributed to the success of thousands of large federal, state, and local government programs, including capital improvement, emergency response and disaster recovery, and energy efficiency, as well as private sector commercial programs.

ENGINEERING, PROCUREMENT, AND CONSTRUCTION

We provide comprehensive engineering, procurement, and construction services for large-scale projects in the environmental, infrastructure, and emergency response industries. We offer a full range of technical and management services to design, construct, and renovate critical infrastructure, including water and wastewater facilities, transportation systems, energy facilities, coastal structures, military bases, and solid waste facilities.

ENVIRONMENTAL CONSULTING AND ENGINEERING

We provide broad-based environmental consulting and engineering services in the private sector as well as federal, state, and local governments. Our certified experts design and construct facilities with the future in mind. Our engineers, consultants, and scientists implement solutions such as identifying energy efficiencies, creating waste minimization programs, and developing strategies for emissions trading. We serve various industries including solid waste, air quality, auditing and compliance, industrial hygiene, and energy efficiency.

EMERGENCY RESPONSE AND DISASTER RECOVERY

We help mitigate the adverse environmental, health, safety, and economic impacts associated with natural and man-made disasters. Our experience, advanced technologies, and global footprint enable a quick and effective response to any emergency, including oil spills, nuclear disasters, terrorist attacks, facility explosions, hurricanes, tsunamis, and earthquakes. We provide waste and debris management, mass care, grant management and administration, environmental remediation, design and construction, program management, and public health and safety services for communities in crisis.

In the last 5 years we have managed \$19B+ in FEMA Public Assistance funds, including:

- ▶ \$5B for Hurricane Sandy recovery in New York and New Jersey
- ▶ Repair of 833 houses, 7 schools, and a hospital in the USVI following Hurricanes Maria and Irma
