COASTAL RESTORATION & MODELING

As one of the leading coastal engineering firms in the nation, APTIM brings 30+ years in successfully designing and implementing coastal engineering projects with focus on beach nourishment and restoration.

EXPERIENCE IN COASTAL MANAGEMENT:

- ▶ Coastal and Marine Engineering
- ▶ Beach and Dune Restoration
- ▶ Numerical Modeling
- ▶ State and Federal Permitting
- ▶ Construction Administration and Oversight
- ▶ Post-construction Monitoring
- ▶ Inlet Management Studies
- ▶ Coastal Structures
- ▶ Resiliency and Living Shorelines
- ▶ Funding Assistance

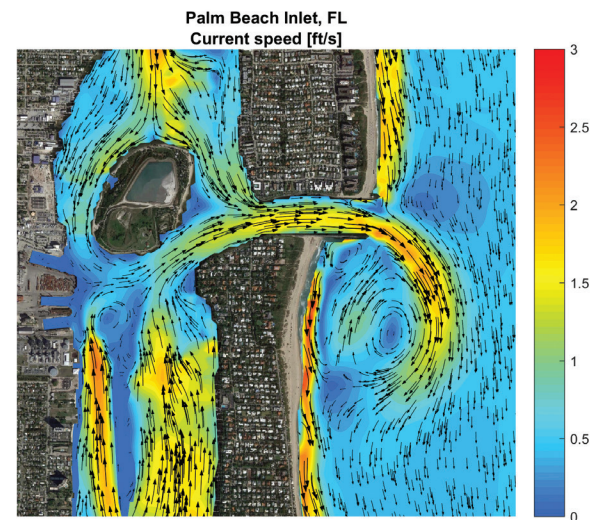

EXPERIENCE THAT DELIVERS:

APTIM has earned an excellent reputation with local, State, and federal agencies responsible for permitting and overseeing marine and coastal programs. We have designed approximately 100 beach nourishment projects and over 30 coastal structure projects for municipal, State, and federal clients throughout Florida, the Gulf coast, and up the Atlantic seaboard.

30+ YEARS

SERVING CLIENTS AND COMMUNITIES

APTIM ENVIRONMENTAL & INFRASTRUCTURE, LLC

HYDRODYNAMIC MODELING WITH DELFT3D

BUDGET-MINDED EFFICIENCIES:

Our decades of experience has instilled a responsibility to address each project with technical excellence, environmental consciousness, and public tax dollar budget-mindedness. We pride ourselves in planning and implementing successful projects and on developing cost effective and permissible designs that meet the needs of our clients.
