

# CUSTOM HOME ON YOUR LOT OR OUR LOT

"A custom home is a unique residence designed for a specific client and location, and built to the homeowner's exact specifications. The homeowner works closely with an architect or designer to create a home that meets their needs and desires, including the layout, size, fixtures, materials, and finishes.

Custom homes are more expensive than other types of homes because they often include custom materials, luxury finishes, and non-standard plans. Building a custom home is also a time-consuming process that can take several months to years to complete. The homeowner needs to be patient and carefully coordinate with the builder throughout the project.

Some reasons to build a custom home include:

Choosing the exact location you want to live

Designing a space that flows with your lifestyle

Incorporating green building techniques or universal design principles" Internet
