

Developer

Waymon Meadows
Since 1974

What is a developer?

"A developer designs and builds a communities. A developer is a person or a company that buys land and builds houses, offices, shops, or [warehouses] on it, or buys existing buildings and makes them more modern."

Developer

Community builders operate at the nexus of operations, marketing, and business development. They are at once creative and analytical, strategic and empathetic, listeners and communicators, constantly working to identify opportunities and create unique, valuable connections between groups of people. Is a home builder the same as a developer?

A developer develops a new community, whereas a builder builds new homes within that community. They work in partnership to ensure the original vision for the community is maintained.

Waymon Ellis Meadows is a combination of a community builder and new community developer designer, new new community builder, custom home designer, and builds new homes on people's lots and in communities he develops.
