

Before I leave HDMS for freshman year, I would like to say a few words of wisdom about 8th grade!

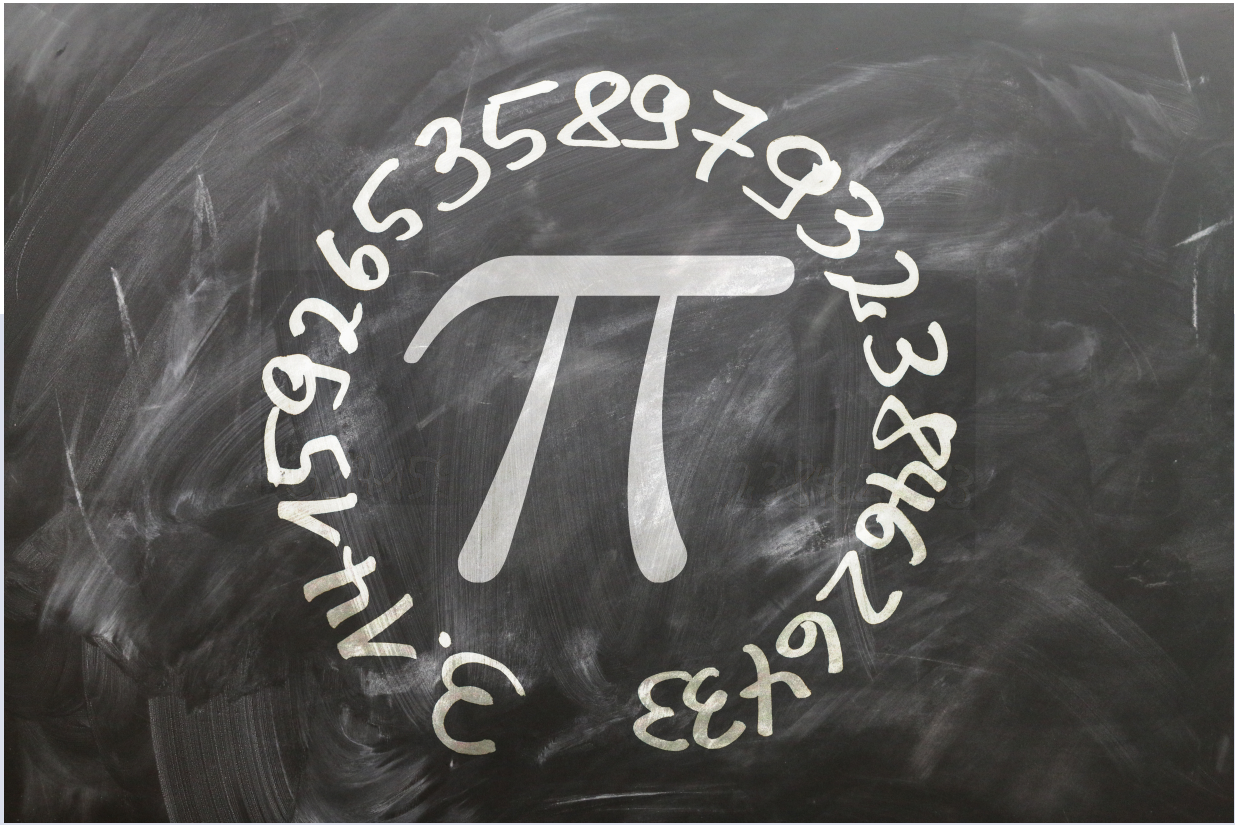

8th Grade ELA

Mrs. Lamothe

Firstly, I'd like to start with ELA: the best class! the teacher is Mrs. Lamothe, she's really nice, (just don't swear in her class)! You learn about Shakespeare, WW2, you get to read a Curious George book, and the Salem witch trials! Also, ask her about France, she loves that country!

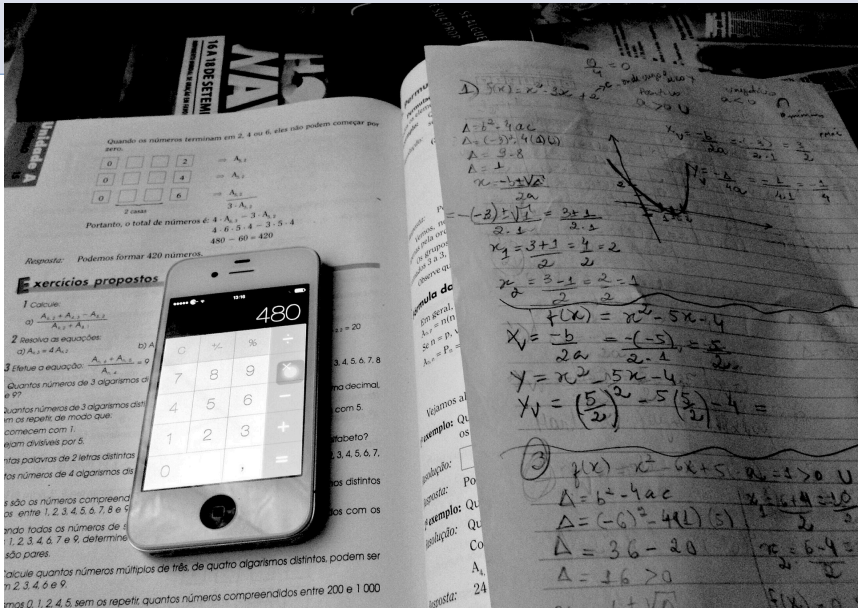

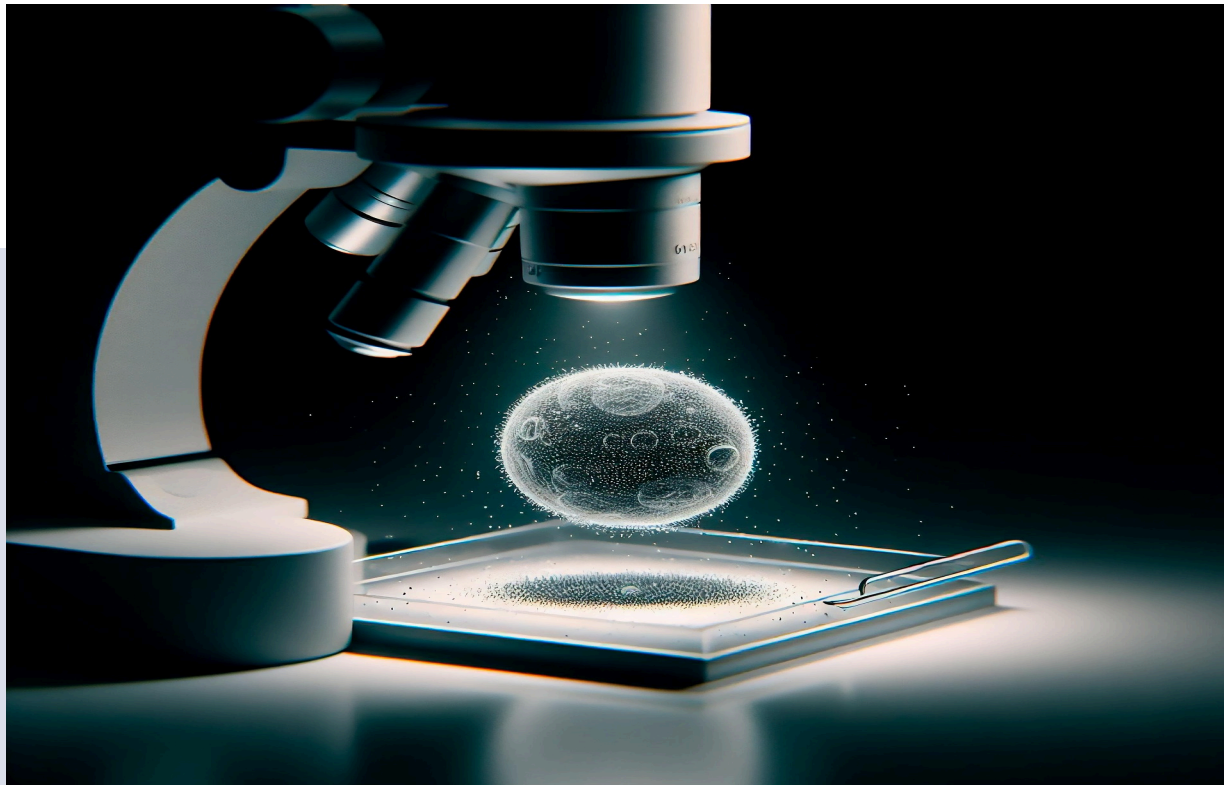

8th Grade Math

Ms. Weston

Then, math is really chill (well....some of the classes are) the teacher is Ms.Weston, she's really sweet! Her class has a really strict rule: no throwing things or you'll get in trouble. You'll enjoy her class even if you're not a math person!

8th Grade Science

Mr. Brown

Science in Mr Brown's class is pretty fun! You take notes almost every day and you do fun labs, and you may even dissect dead sharks! You learn a lot of neat concepts about different types of science. I wish next year's kids good luck!
