What Kind of Show is *Murder Drones?!*

Murder Drones is an eight episode show with an interesting plot, fascinating characters, and overall a great show. It takes place in the year 3071, humans accidentally trigger a core collapse that wipes out all biological life on the frozen exoplanet Copper 9. The planet's surviving Worker Drones build an isolated society until a megacorporation sends lethal Disassembly Drones (nicknamed "Murder Drones") to exterminate them. A rebellious teen Worker Drone teams up with a rogue Murder Drone to survive, eventually uncovering a terrifying reality-bending software virus called the Absolute Solver.

There are lots of important characters in this show! There's N, Uzi. V, J, Thad, Lizzy, Doll, Nori, Kahn, Cyn, Tessa, and many more! Those are just the main characters!

Who are the main characters in *Murder Drones* and what are their roles?

The show follows a drone Named Uzi who is trying to destroy the murder drones that are trying to kill the worker drones.

Uzi goes to the Murder Drone Spire in which she has to fight a murder drone. She blows the drones head off but it regenerates. Also, the drone who is revealed to be N's technology, failed which makes him think Uzi is a murder drone. After one talk with N, Uzi has to run away because the other murder drones, V and J, are arriving. V and J find N damaged and fix him by slapping him back together.

That's all I can reveal without spoiling more! Anyways, this is why I think you should watch it in my opinion. My favorite characters are Uzi, N, and V; my favorite episodes are episodes one, four, and eight!
