Fortnite Tips & Strategies!

WARNING: SOME OF THESE WAYS TO WIN MIGHT BE OUTDATED!

So, pretty much everyone knows the basics of Fortnite, you load into the game and choose somewhere to land then eliminate as many players as you can but, there are ways to make Fortnite like, five times easier, and that's what I will be telling you about today. First off, this is the best, but most boring ways to win.

Continued on Page #3

The Fishing Strategy:

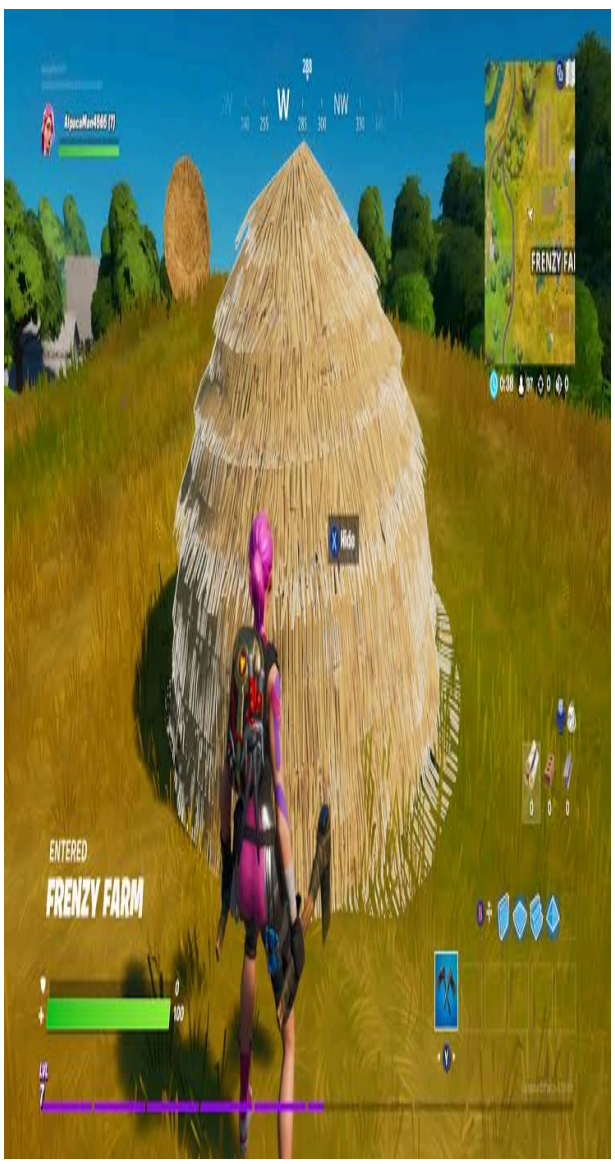

Step one: Land near the edge of the ocean water surrounding the island,
Step two: Get a random weapon of your choice just in case you come across an enemy,
Step three: Find a fishing rod,
Step four: Go fishing and eat all the fish you catch eventually you will catch storm sickness but don't worry all that means is that you'll lose health faster so as long as you keep fishing and eating you'll usually win the game without having to confront advanced players.

Next strategy listed below has a little bit more action, and is still a little bit easier to win.

THE HIDING STRATEGY

Step one: Land wherever you prefer.
Step two: Collect some loot of your choice.
Step three: Collect as much gold as you can from chests, cash registers, and safes.
Step four: Once you have collected between 350 and 600 or more gold, go to your map and find an NPC (non-playable character).
Step five: hide and let your NPC bodyguard protect you if the NPC dies you may have to fight a bit.
