All About Foxes!

Fun Fox Facts!

Are you a silly animal lover? Foxes love diving into thick piles of snow.

Foxes love to eat small birds and mammals are consumed, including mice, voles, rats, rabbits, and bird eggs. Foxes are super silly animals, who love to hunt berries and eat fish!

Appearances!

Most Foxes by the time they are an adult they usually weigh 7-15 lbs and measure 35-40 inches from the tip of their nose to the tip of their tail. Most foxes look an orangey red-ish color and those kinds of foxes are called red foxes.

ALL ABOUT FOXES!

Fox Family!

There are many foxes in the fox family including the canidae.

Foxes are actually not part of the cat family, they are actually part of the dog family.

This is because they are biologically more related to dogs than cats.

Life History!

Both species of foxes breed mid January and start to prepare dens at this time. A den is like a burrow in the earth that usually is 15-20 feet long.

Dens usually have many entrances. Foxes often enlarge the burrow of other burrowing animals like woodchucks.
