Monster Hunter Updates!

By Ethan - Grade 8

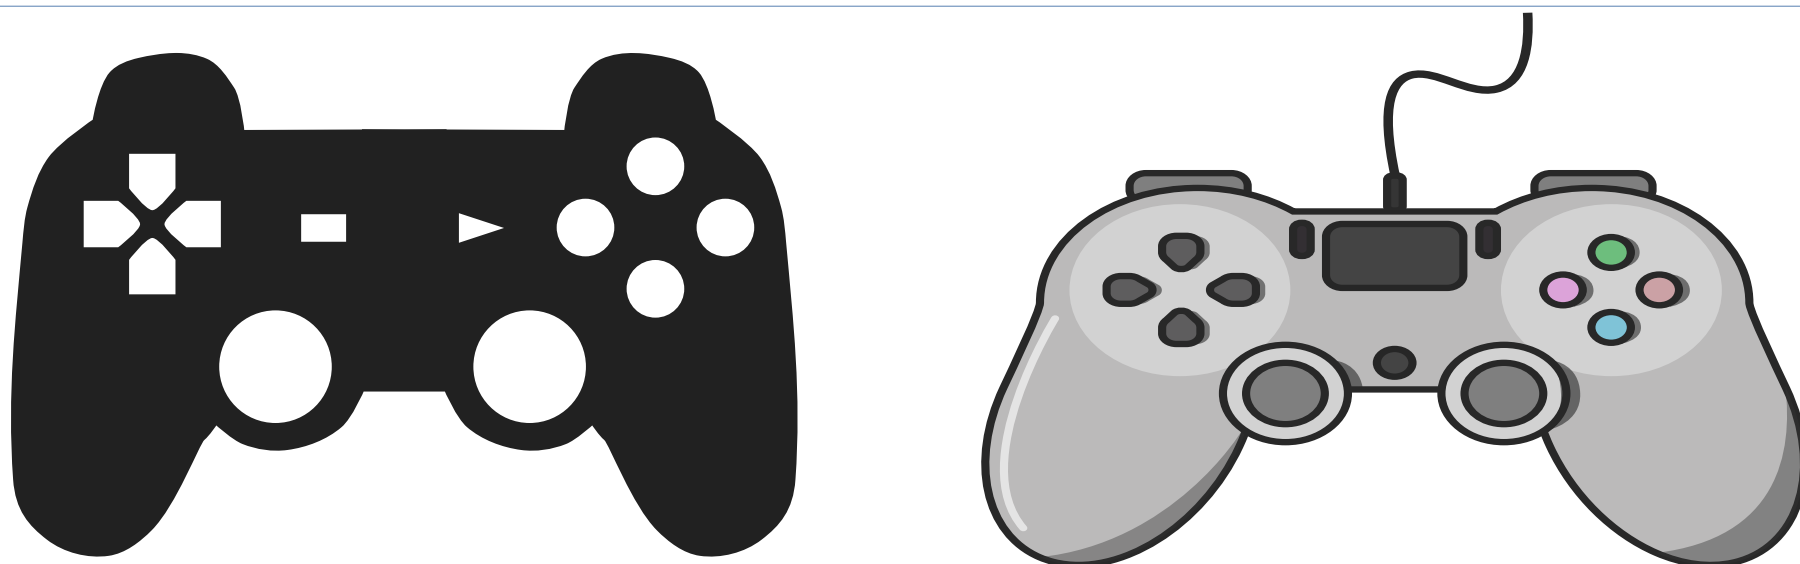

New Updates!

Video Game HQ Is The Best!!

The recent Monster Hunter updates have allowed you to experience a lot more from the game. They have added more quests, features, and bug fixes. In a less recent update, they added a community center which had multiple events and rewards. The community center adds minigames and arena quests; arena quests are special high-rank quests that give special rewards!

Future Planned Updates

Expanding endgame content planned for Title Update 3 will be moved to Ver.1.021 Update on August 13.

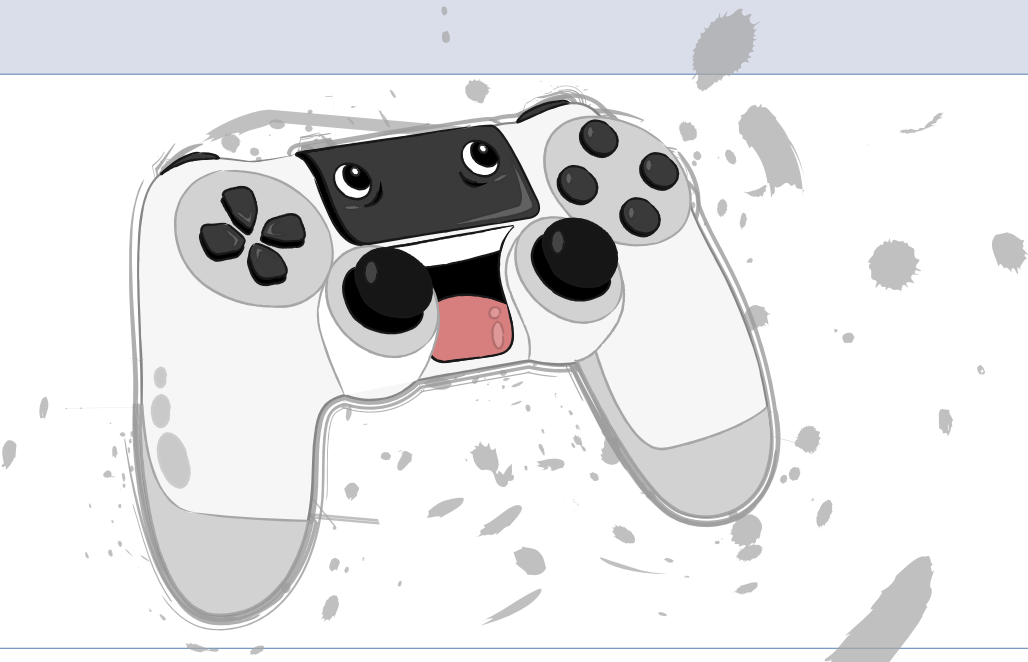

Final Fantasy Teamwork!

HDMS Journalism Rocks!

But the important part is the new boss quest line. It's part of the collaboration with Final Fantasy 14. There's a new boss that's unyieldingly hard compared to any other boss in the game and has more resistance than any other boss.

New Boss Alert!

Monster Hunter At Its Best!

This boss's name is Omega Planetes. This boss represents a giant beetle robot that shoots lasers, rains down bombs, fist rockets, fire jets, and dashes. All of his abilities deal either your entire health or half your health. His abilities also lay a wall of fire which doesn't inflict burn, but does more damage the longer you're in it. The story behind the boss is robots from another dimension trying to conquer planets for valuable resources. This boss also has multiple different phases that get harder and harder.
