What's the Series?!

Murder Drones is an independent, 3D-animated sci-fi horror-comedy web series produced by Glitch Productions and created by Liam Vickers. The series, which premiered in 2021 and concluded in 2024, is set in a post-apocalyptic future where robots have outlived humanity.

Murder Drones is generally considered acceptable for 12-year-olds (rated 13+ or TV-14 by some platforms) due to moderate, cartoonish violence, dark humor, and some mild swearing. While blood is replaced by oil, the scenes can be intense and sometimes gory, featuring robot dismemberment. Parents often recommend it for ages 11+ to 13+.

Violence: The show is action-packed with frequent scenes of robots stabbing and fighting. It features a "body horror" style with robots getting ripped apart, which can be intense.

Intensity: There is a consistent atmosphere of dread and danger, particularly in later episodes.

Language: Mild profanity is used, including words like "crap" and "damn," often featuring dark, sarcastic dialogue.

Themes: Some references to dark themes exist, which may go over the heads of younger viewers.

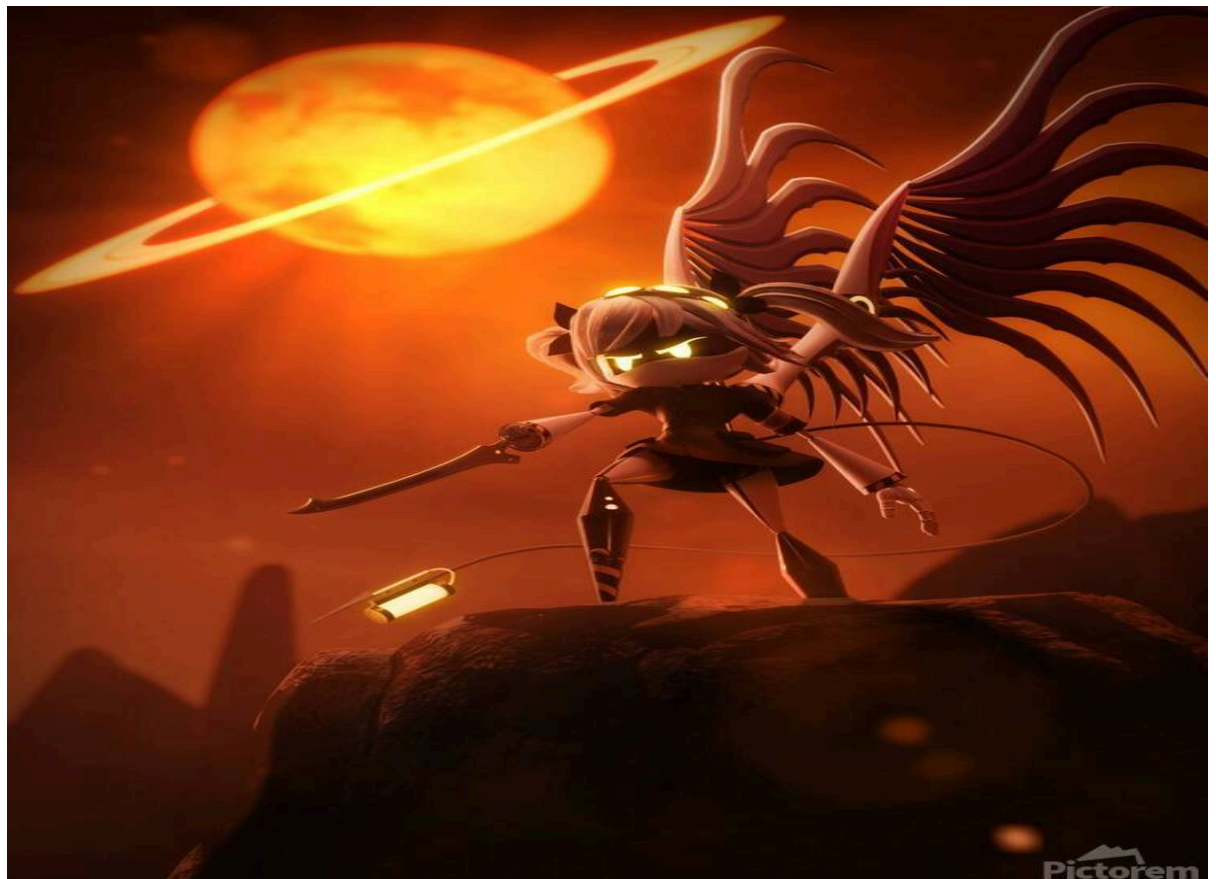

What's this series about?!

With the main character being Uzi Doorman, an angsty teen who just wants to find out about her mom. Serial Designation N, Uzi's travel partner and best friend. Serial Designation Robots (like N) are robots who are designed to kill run away robots Worker Bots but not N, N is different he turned good and is now Uzi's Travel Buddy.

Worker bots are bots who are built to work, Uzi is a Worker bot but later gets the Absolute Solver, The Absolute Solver is a powerful, reality-warping AI virus and the main antagonist in Glitch Productions' Murder Drones series. It acts as a sentient "zombie drone" program that mutates within damaged AI—usually Worker Drones—to manipulate matter, repair drones into eldritch forms, and destroy worlds. It acts through hosts like Cyn and Uzi, creating a "5/5" threat level.

Cyn is the main antagonist of Murder Drones, a sadistic AI and the primary host of the Absolute Solver virus. Originally a disposed Worker Drone, she acts as a chaotic, quirky entity that utilizes flesh-manipulating abilities to destroy planets. She created the Disassembly Drones (N, J, V) and often puppets Tessa's corpse.

Tessa Elliott is a key, yet tragic, human character in Murder Drones, acting as a compassionate caretaker to drones at Elliot Manor. Originally a "certified technician" for JCJenson, she distinguishes herself through her affection for worker drones.
