

Video Game HQ Review!

What Should You Play?!

“Terraria, Wait WHAT?”

Hello and welcome! If you did read my last “HQ Essay.” you’ll know that I’m not doing A N O T H E R Terraria article for a bit... because I’ll lose my mind. On the same topic, we are going to be talking about my RPG game today. So get a snack, kick-back and get ready!

Wanna Try?!

When you spawn in you'll hear that soundtrack will be playing. The soundtrack is "The Tale Of A Cruel World." That aside you will see "The Strongest Of Today" ("The Strongest Of Today is my Dev exclusive NPC") NPC in the spawn. He WILL help you if you talk to him.

This NPC will also go as far as to be helping you past WOEPD (World Of Elder Primordial Deitys.) Or "WOTTG ("Wrath Of The True Gods.") (WOEPD And WOTTG depend On which route you choose) which is past endgame (Post-Endgame)

That will be basically the wiki. He won't tell you about races and where to get materials, which means that one of my friends has an admin exclusive NPC to tell you where those are, mine is "The Strongest Of History" and he will say "(Well, It seems that you're new... So... Do you need help with anything?" Then my friend's NPC will say - "seems you're new... I can tell.

Anyway did that IDIOT forget to tell you about races and where materials Like he always does?" That's what he says upon talking to him for the first time.

Are You Ok Playing?!

Now this game may seem like an annoying and WAY too tedious RPG-game but all of the “WAY” hard stuff is not necessary by any means! So that means that for the casual player the game isn’t that hard to grind and plus and a MAX server size is 25 players in one server. So it’s 25 times the fun.

“A God Does Not Fear Death”!

This game CAN get EXTREMELY tedious but of course that’s only if you are “Weird” and don’t go outside. For example ONE of the titles Kami O Korosu Mono is to No-Hit EVERY SINGLE BOSS AND MINIBOSS(Superbosses included). You have to use in-stage gear for every boss, then submit it to the discord for a admin to approve. Which can be tedious or outright annoying. Then, if you have common sense you can tell that all of that is just for people who LOVE tough games. Finally, REMEMBER that this game is perfectly fine for the casual player who just wants to have fun because you don’t need to be ultra talented to have fun.

For The Fandom!

For your information, there is a LOT of lore, roughly around 46 pages of lore, and currently, we’re going to add a lot more. So just sit-tight and see for yourself. The Discord has a tab for lore and a different lore tab for people to figure out the lore.

Routes -Gameplay!

The route you take does matter A LOT. You can choose to defeat everyone and do the “Dangerous Route”. Or you can spare everyone and Do Pacifist Route, or defeat some spare enemies (Bosses) and get neutral. Now here are all of the routes:

- “Dangerous Route”
- Pacifist
- Neutral
- Soulless Pacifist
- True “Dangerous Route”
- True Pacifist
- Tears In The Rain
