Today's Organ Music

Johann Sebastian Bach (1685-1750): Prelude and Fugue for Organ in E-Minor, BWV 533
This piece originates from the time when Bach was still in his twenties. He had just got his first real job in Arnstadt. He was hired as a church organist, in 1703, after a brilliant performance when testing the new organ. But a couple of years later, it was actually criticism of his organ playing that was given as one of the reasons for letting him go. He was supposed to have used too many 'curious' variations and 'strange' notes in his chorale preludes. The church council believed that this confused the congregation.

In this concise Prelude and fugue, we hear both sides of the coin. In the prelude, which we will hear as the organ prelude for today, there are short pedal solos, shaking tremolos for both hands, and series of full chords for keyboard and pedal simultaneously – all exciting musical elements which can also be used, if necessary, to test an organ's sound and speed of response.

These elements return in the fugue, our organ postlude for today. It opens with a moving theme – first modestly and almost hesitantly, but later with increasing assurance. Towards the end, there is a passage where Bach makes the left hand stand out rather dissonantly against the right hand, in opposition to the rules of composition. This is precisely the sort of "fremde Thone" (strange notes) to which people later objected in Arnstadt. Here, we see a youthful and rather impetuous Bach. On the one hand, an excellent job application, and on the other a reason for dismissal.
