

# Veeam Backup and Recovery with Wasabi

## Combine industry-leading backup and restoration with hot cloud storage for the best cloud data management

Data is growing exponentially every year, in some industries it's more than doubling. This growth is putting a strain on legacy backup products and the financial budgets of IT managers caught unaware of unforeseen cloud storage costs.

Veeam and Wasabi have teamed up to deliver a data protection solution that delivers the low cost, capacity scalability and performance that first generation backup solutions can't match.

Customers using Veeam backup and replication with Wasabi's cloud storage reduce risk associated with data backup and recovery activities at a significantly lower cost than other solutions. They accomplish this by speeding up recovery times and compressing backup windows as well as reducing the frequency and duration of impactful data related interruptions to business operations. Further, the Veeam and Wasabi combination is cost effective, because it minimizes the requirement for on-premises hardware and allows businesses to realize the benefits of infinite cloud storage.

The Veeam and Wasabi combination makes the core processes for data backup and recovery operations more efficient. Running data backup and recovery operations on Veeam and Wasabi, makes running these operations more cost effective and faster. This not only limits risk related to these activities but also helps ensure business continuity while reducing operational costs associated with backing up and recovering data.

## Veeam Backup & Replication Streamlines Data Protection

Veeam Cloud Tier, included in Veeam Availability Suite 9.5 Update 4, is the built-in automatic tiering feature of Scale-out Backup Repository™ that offloads older backup files to more affordable storage, such as Wasabi Hot Cloud Storage.

- Leverage the low cost, simplicity and elasticity of Wasabi's object storage.
- Store data in the cloud without any API call or egress fees unlike with other cloud storage providers
- Avoid vendor lock-in associated with secondary storage appliances and first-generation cloud storage providers.

Veeam helps you achieve availability for all your virtual, physical and cloud-based workloads. With a single console, you can manage fast, flexible and reliable backup, recovery and replication of all your applications and data. Veeam Backup & Replication provides fast and dependable backup for all workloads, giving you the ability to achieve shorter backup windows and reduce backup and storage costs. Lightning-fast and reliable restores let you quickly recover individual files, entire VMs and individual application

## KEY FEATURES

- Fast, reliable, and efficient backup & recovery
- Low cost cloud object storage for Veeam Cloud Tier
- Industry leading data durability and immutability
- Seamless integration and operation
- Veeam Ready Object qualified interoperability

## BENEFITS

- Lower total cost of ownership for IT Infrastructure and Cloud Storage
- Risk mitigation by reducing the frequency of outages and performance degradation related to backup and recovery activities
- Increased confidence in the stability and availability of backed up data
- IT staff productivity benefits

components with confidence. And advanced, image-based replication and streamlined disaster recovery capabilities ensure high availability for all your mission-critical applications.

## Wasabi Hot Cloud Storage Delivers Breakthrough Economics and Performance

Wasabi is the hot cloud storage company delivering low-cost, fast and reliable cloud storage on-demand. Wasabi's solution is 80% less expensive and up to 6x faster than first generation cloud vendors. Wasabi hot cloud storage is designed with eleven nines (99.999999999%) of object durability and data immutability that guarantees stored objects cannot be deleted or modified by anyone. Not only is Wasabi 80% less expensive to store data than traditional cloud providers, there are also no fees for egress or API requests.

Wasabi keeps all data "hot" so it can be accessed in milliseconds. All Veeam and Wasabi customers can treat their data as hot data, so they can shorten backup windows, and quickly access their data for faster restore times.

Wasabi is qualified as Veeam Ready Object and is now available using the S3 Compatible Object Storage selection within Veeam.

## Versatile Solution Supports Many Use Cases

The combination of Veeam Backup & Replication and Wasabi Hot Cloud Storage enables your backup and recovery operations processes to operate more efficiently. You limit risk related to these activities and ensure business continuity and reduced operational costs associated with backing up and recovering data.

Efficiencies are achieved by

- Less time doing and managing backups
- Fewer and more efficient recovery efforts
- Faster restores
- IT infrastructure cost reductions

### ABOUT WASABI

Wasabi is the hot cloud storage company delivering low-cost, fast, and reliable cloud storage. Wasabi is 80% cheaper and up to 6x faster than Amazon S3, with 100% data immutability protection and no data egress fees. Created by Carbonite co-founders and cloud storage pioneers David Friend and Jeff Flowers, Wasabi is on a mission to commoditize the storage industry. Wasabi is a privately held company based in Boston, MA.
